MultiSeis

A UNIQUE MULTI-PURPOSE MARINE SEISMIC PROGRAM

Widely used since mid 1999.

Deployed on Hydrossearch Marine Seismic Surveys.

Leased and Sold to various Oil Companies and Seismic Contractors

A database orientated solution designed for Marine Seismic Surveys.

A Project Management, Reporting and Archiving package with a strong Navigation QC content.

The program has a broad base of appeal and lends itself to pre, during and post survey use. Of value in-house and offshore.

DEVELOPED

BY

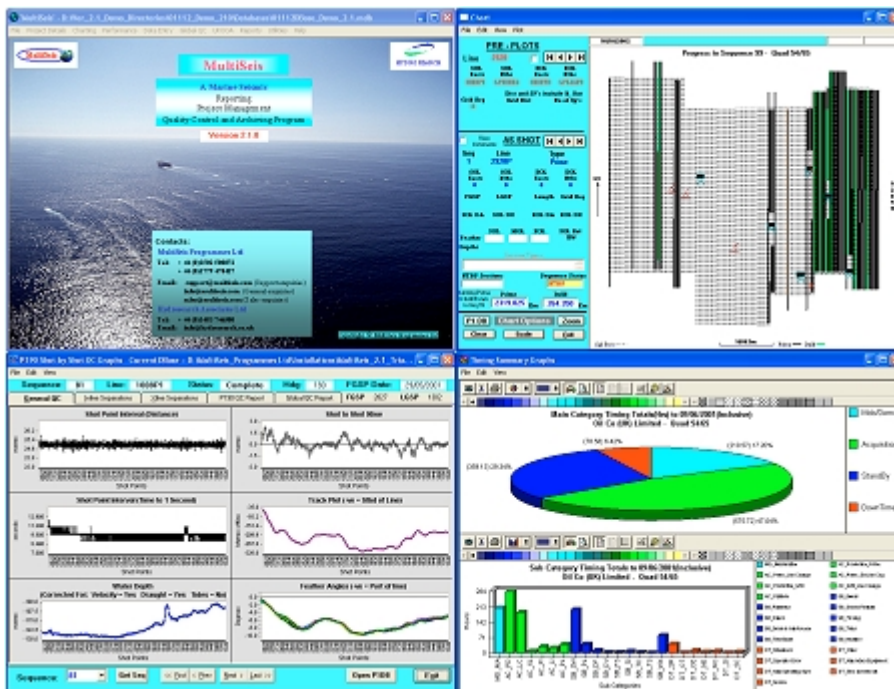

MULTISEIS PROGRAMMES LTD

- Automated daily diary.
- Project Timing and Costing Summaries.
- User definable and automated daily/weekly etc report, includes HS&E Statistics.
- Rapid and varied presentation of data via Graphs, Reports, Charts and Summaries.
- Automatic import and storage of contractor QC files.
- Excellent Project QC content.
- Automatic import of P190 data
- Graphical and numeric P190 QC.
- Report export in (.xls), (.rtf), (.pdf), (.html), (.txt) and (.tiff) formats.

MultiSeis is user friendly, intuitive and easy to use with logical menus

OVERVIEW

MultiSeis has been produced by field personnel with many years 'hands on' seismic experience. The current version is the result of this experience plus feedback from clients during the past three years. It organises Project Details, Operations, Timings, production and QC within a relational database.

UNIQUE FEATURES

MultiSeis has many unique features too numerous too cover here but some samples are outlined below:

User Defined Database Setup – Allows the user to define database setup, from survey type and configuration to timing categories and HSE definitions.

User Defined Daily Report – Allows the user to define what is output to the daily report and in what order. Sample outputs include: Basic Project Details, HSE (Events + Man Hours), Timing, Production, Global Progress, Diary etc.

Charting Routines – Enables the plotting of Pre-plots, Progress/Production (by start and end co-ords or SP by SP), binning boundaries, obstructions, Vessel, Ssrc, Rcvr, TBUoy positions and feather.

SYSTEM REQUIREMENTS

Windows 95, 98, ME, XP, NT v 4.0 and 2000. At least 40mb available disc space and 32 mb RAM.
